G.703/64K FAMILY

G703/64A Pack

Single Port G.703/64K Series Converters

Model No: G703/64A-V35

Model No: G703/64A-X21

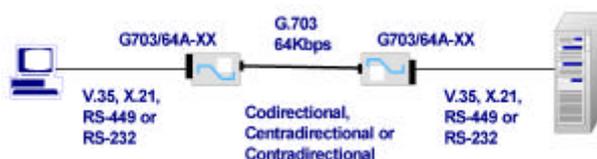

Model No: G703/64A-232

The G703/64A interface converter allows full conversion between G703/64Kbps and ITU-T V.35, X.21 or EIA RS-232 hardware. The interface converters are very easy to implement. Simply connect the appropriate interface cables, connect the external DC power adapter, and select the required timing for translation. This product family features full compliance with all the relevant ITU-T & EIA standards under 64Kbps network environments with high reliability. This product can be used widely in the Packet Switching Network, ISDN and DDN. It is also useful for data terminals to access PCM, 64K/2048Kbps digital channels as well as digital microwave channels. Additionally, it can be connected to Satellite Communication Channels such as SPAR series.

Features

- Selectable codirectional, centradirectional or contradirectional
- Single port access to 64Kbps services
- Interface conversion between G.703/64K and V.35, X.21 and RS-232
- Diagnostic Loopback
- Data rate: 64Kbps for Synchronous mode
19.2Kbps for Asynchronous mode
- Fully transparent signal conversion
- DC +9V input power AC adaptor included.

Application

Specifications

ITU-T G.703 interface specification

- **TYPE** Codirectional, centradirectional or contradirectional 64Kbps
- **Line** 4/6 wires, 19 to 26AWG twisted-pair cable
- **Range** Up to 800 meters over 24AWG wire
- **Impedance** 120 Ohms
- **Pulse amplitude** 1.0V ± 10%
- **Zero amplitude** 0V ± 0.1V
- **Clock frequency** 64KHz
- **Frequency tracking** ± 500ppm
- **Interface connector** RJ-45
- **Complies with** ITU-T G703 and G823
- **Frame format** Unframed only
- **Line code** Codirectional or AMI

Data communications interface specifications

- **Interface Type** RS-232 ; DB25 Female
V.35 ; DB25 - MB34 adapter cable
X.21 ; DB25 - DB15 adapter cable
- **Data rate** 64Kbps for synchronous
19.2Kbps for Asynchronous
- **Connector** DB25/F with adapter cables
Balanced for V.35 and X.21
Unbalanced for RS-232

Indicators

- **Signal Loss** G.703 Receive signal loss
- **Timing Loss** G.703 Receive timing loss
- **RD** Receive data
- **SD** Send data
- **POWER** DC9V input power
- **GRD** G.703 side receive data
- **GSD** G.703 side transmit data

Ordering Information

- **G703/64A-XXX**
Optional cable:
V.35, X.21, RS232
RS449, RS530
- **Example :**
G703/64A-V35
G.703/64A Pack with V.35 cable

G.703/64K FAMILY

G703/64A-STD Standalone

E1/T1 DSU/CSU
G703-64K FAMILY

Single Port G.703/64k Series Converters

The **G703/64A-STD** interface converter allows full conversion between G.703 64Kbps services and a number of Data Port Interfaces including ITU V.35, X.21, RS-530, RS-449 and EIA RS-232 hardware. The interface converters are very easy to implement. Simply select the model and appropriate interface settings and adapter cable, configure the required timing for translation via internal DIP switches, and connect to AC power. This model features full compliance with all the relevant ITU & EIA standards under 64Kbps network environments with high reliability.

This product may be used widely in the Packet Switching Network, ISDN and DDN. It is also useful for data terminals which access PCM, 64K/2048Kbps digital channels as well as digital microwave channels. Additionally, it may be connected to Satellite Communication Channels such as SPAR series.

Features

- Single port access to G.703 64Kbps services.
- Supports Interface for V.35, X.21, RS-530, RS-449 and RS-232. (DIP Setting & adapter cable)
- Data rate: 64Kbps for Synchronous mode. 19.2Kbps for Asynchronous (RS-232) mode.
- Fully transparent signal conversion.
- Diagnostics: local and remote analog and local digital loopback.
- Selectable timing modes: recovery, transparent, dataport or internal OSC.
- Data Port provides 10 bit FIFO.
- Accepts 90~240VAC input power.

Specifications

ITU-T G.703 Interface Specifications :

- TYPE Codirectional/Conradirectional/ Centradirectional 64Kbps
- Line 4/6 wires, 0.5 -0.7mm twisted pair cable.
- Range Up to 800 meters over 24AWG twisted pair or better.
- Impedance 120 Ohms.
- "Pulse" amplitude 1.0V Nominal $\pm 10\%$.
- "Zero" amplitude 0V Nominal $\pm 0.1V$.
- Clock frequency 64Kbps.
- Frequency tracking $\pm 100\text{ppm}$
- Interface connector DB9F.
- Complies with ITU-T G.703 and G.823.
- Frame format: Unframed only.
- Line code 64Kbps codirectional, conradirectional or centradirectional line code, selectable.

G703/64A-STD/AC

G703/64A-STD/48

G703/64A-STD/24

Data Communications Interface Specifications :

- **Interface Type :** RS-530; DB25F connector.
RS-232; DB25F connector.
V.35; MB34F adapter cable.
X.21; DB15F adapter cable.
RS-449; RS-530 to DB37M adapter cable.
- **Data rate :** 64Kbps for synchronous.
19.2Kbps for Asynchronous.
- **Data type :** Balanced for V.35, X.21,
RS-530, RS-449 Unbalanced for RS-232.

LED Indicators

- **PWR** Input Power applied.
- **TD** Transmit data.
- **RD** Receive data.
- **RTS** Request To Send (Data).
- **DCD** Data Carrier Detect (Data).
- **TX** Transmit data (G.703).
- **RX** Receive data (G.703).
- **Signal Loss** G.703 side received data loss.
- **Timing Loss** G.703 side sync loss.
- **Err** Error in timing or received data.
- **Test** Loopback test active.

Ordering Information

G703/64A-STD/AC

G703 Rack standalone with AC adapter & cable

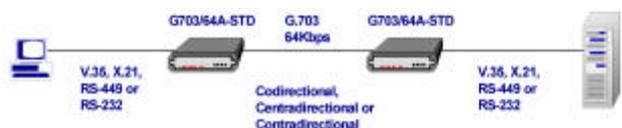

G703/64A-STD/48

G703 Rack standalone with DC 24V adapter & cable

G703/64A-STD/24

G703 Rack standalone with DC 48V adapter & cable

Application

RM-G703/64

G.703/64K Rack Mount

The **RM-G703/64** is a Rack Type G.703/64K Interface Converter for network access which is nested in a hub and provides an economic solution for central site users. There are 12 slots available for **RM-G703/64** cards for installation into the **RM-G703/64** rack. An optional SNMP card can be installed into the last slot for configuration and management. The SNMP card provides both local control via an RS-232 craft port and remote management using industry standard SNMP protocol via an Ethernet 10 Base-T connection.

The **RM-G703/64** allows full conversion between G.703 64Kbps services and a number of Data Port Interfaces including ITU V.35, X.21, RS-530, RS-449 and EIA RS-232 hardware. The **RM-G703/64** is very easy to implement. Simply select the model and appropriate interface settings and adapter cable, configure the required timing for translation via DIP switches on the card. This model features full compliance with all the relevant ITU & EIA standards under 64Kbps network environments with high reliability. This product may be used widely in the Packet Switching Network, ISDN and DDN. It is also useful for data terminals which access PCM, 64K/2048Kbps digital channels as well as digital microwave channels. Additionally, it may be connected to Satellite Communication Channels such as SPAR series.

The **RM-G703/64** optionally accommodates up to two separate power supplies, which may derive power from AC (110/220) or DC (-48V) power sources. When two power supplies are installed, the modules provide power redundancy and are hot swappable even during the I/O cards' transmission.

Features

- Central HUB Solution in a Standard 19" Rack. Up to 12 I/O cards may be installed.
- High density & compact design in a 4U high rack.
- Single port access to G.703 64Kbps services.
- Supports Interface for V.35, X.21, RS-530, RS-449 and RS-232.
- Data rate: 64Kbps for Synchronous mode. 19.2Kbps for Asynchronous (RS-232) mode.
- Fully transparent signal conversion.
- Diagnostics: local and remote analog and local digital loopback.
- Selectable timing modes: recovery, transparent, dataport or internal OSC.
- Data Port provides 10 bit FIFO.
- Accepts 90~240VAC input power. Hot Swapping of cards and redundant power supplies supported.
- Optional console port allows terminal to setup and monitor operation locally.
- Optional SNMP network management system card.
- LED Line status display on each card.

Specifications (Cont.)

Data Communications Interface Specifications :

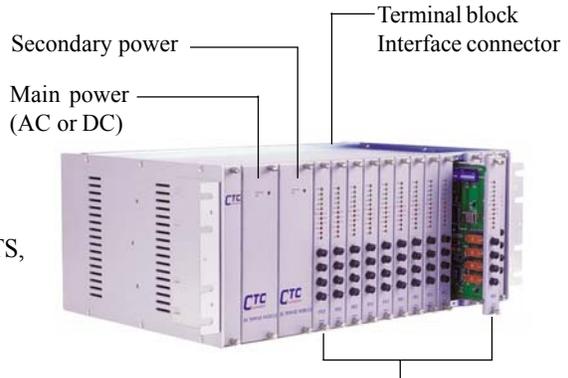

- **Interface Type :** RS-530; DB25F adapter cable.
RS-232; DB25F adapter cable.
V.35; MB34F adapter cable.
X.21; DB15F adapter cable.
RS-449; DB37M adapter cable.
- **Data rate :** 64Kbps for synchronous.
19.2Kbps for Asynchronous.
- **Data type :** Balanced for V.35, X.21, RS-530,
RS-449 Unbalanced for RS-232.

Data Port (Misc.)

- **Control signals** CTS constantly ON
DSR constantly ON,
except during test loops
DCD constantly ON or follows RTS,
except during signal loss
